PROFESSIONAL SUMMARY

Integrated Master of Computer Applications (IMCA) student specializing in Cyber Security & Forensics with hands-on experience building AI-powered cybersecurity and full-stack applications using Python, FastAPI, Next.js, and TypeScript. Published cybersecurity researcher with strong foundations in Machine Learning, Network Security, and Secure Software Development. Passionate about developing practical solutions to real-world security challenges and eager to contribute as a Python/AI Developer or Cybersecurity Intern.

EDUCATION

Parul University

2023 – 2027

Integrated Master of Computer Applications (IMCA)

Specialization in Cyber Security & Forensics (CSF)

Vadodara, Gujarat

· CGPA: 8.22

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C, SQL

Machine Learning: Scikit-learn, Random Forest, Feature Engineering, Model Training, Model Evaluation

Backend & Database: FastAPI, SQLAlchemy, SQLite, Supabase, REST APIs

Frontend: Next.js, Tailwind CSS

Cybersecurity: Wireshark, Nmap, Burp Suite, Metasploit, Hydra, John the Ripper, Autopsy

Security & Concepts: Network Security, Web Application Security, API Security, Authentication & Authorization (JWT, OAuth2), RBAC

Tools & Platforms: Git, GitHub, VS Code, Kali Linux, Ubuntu Linux, Windows

SELECTED PROJECTS

PhishGuard - AI Phishing Detection Platform

2026

Machine Learning & Full-Stack Application

🐙 GitHub

🌐 Live

- Built an AI-powered phishing URL detection platform combining rule-based analysis with Machine Learning.
- Developed a FastAPI backend and Next.js frontend featuring threat analytics, explainable predictions, and exportable threat reports.
- Trained a Random Forest model using Scikit-learn with URL feature extraction, blacklist validation, and brand spoof detection.

CyberSentinel AI - Intelligent Network Monitoring

2026

Desktop Cybersecurity Platform

🐙 GitHub

- Developed an AI-assisted desktop cybersecurity platform for network monitoring and threat detection.
- Implemented device discovery, packet capture, traffic analytics, and threat intelligence modules.
- Built using Python, Electron, React, FastAPI, and SQLite with a modular, scalable architecture.

Get2Gather - Campus Event Management System

2025

Team Leader & Lead Full-Stack Developer

 GitHub

 Live

- Designed and developed a full-stack campus event management platform supporting event discovery, registration, and analytics.
- Implemented secure RBAC authentication using OAuth2, JWT, and Argon2 password hashing.
- Built using Next.js, TypeScript, FastAPI, SQLAlchemy, SQLite, and Tailwind CSS.

Developer Portfolio

2026

Interactive Full-Stack Portfolio

 GitHub

 Live

- Designed and developed an interactive portfolio showcasing projects, research, and technical expertise.
- Implemented reusable components, responsive layouts, and a modern user experience.
- Built using Next.js, TypeScript, Tailwind CSS, Framer Motion, and ShadCN UI.

RESEARCH & PUBLICATIONS

Cybersecurity Challenges and AI-Based Solutions in Industry 4.0 Environments

March 2026

Published Research Paper & Conference Presentation

 Paper

 Certificate #48

- Published in the International Journal of Scientific Research in Science and Technology (IJSRST).
- Presented at PRERNA 2026, Parul University (Certificate Listing: Row 48).
- Explored Industry 4.0 cybersecurity challenges, AI-driven threat detection, and modern defense strategies.

CERTIFICATIONS

- Cisco Python Essentials 1
- Cisco Ethical Hacker
- Cisco Network Defense
- Cisco Endpoint Security
- ISC² Certified in Cybersecurity (CC) Self-Paced Training
- NPTEL - Data Structures & Algorithms using Java
- SkillFront - ISO/IEC 27001:2022 Information Security Associate

ACHIEVEMENTS

- Published cybersecurity research in the International Journal of Scientific Research in Science and Technology (IJSRST) and presented it at PRERNA 2026.
- Developed 4 production-ready AI, cybersecurity, and full-stack applications using Python, FastAPI, and Next.js.
- Led the successful design and development of a secure full-stack campus event management platform as Team Leader.

INTERESTS

- AI & Machine Learning
- Cybersecurity Research
- System Design
- AI Security
- Open Source
- Building Developer Tools
